INVESTOR IN PEOPLE

SCHOOL WORKFORCE IN ENGLAND

(including pupil: teacher ratios and pupil: adult ratios)

JANUARY 2007 (PROVISIONAL)

INTRODUCTION

This statistical first release (SFR) contains information on the School Workforce in England. It combines information on teacher numbers and vacancies, sickness absence and ethnicity with information on support staff, pupil: teacher ratios (PTR) and pupil: adult ratios (PAR).

The SFR provides provisional January 2007 data together with comparable figures for 1997 onwards. A new table providing the number of staff in Academies has been added.

Pupil characteristics and class sizes are published separately today in SFR 16/2007.

KEY POINTS

TEACHER NUMBERS

The provisional January 2007 results for the local authority (LA) maintained sector show:

- the full-time equivalent (FTE) number of regular teachers fell by 600 (0.1%) to reach 434,900 in January 2007;
- in the nursery and primary phase FTE regular teachers went down by 1,200 to 196,900;
- in the secondary phase FTE regular teachers rose by 400 to reach 216,700;
- in maintained special schools, pupil referral units and education elsewhere FTE regular teachers rose by 200 to reach 21,200.

In addition, there were 3,200 FTE teachers in Academies in England in 2007.

TEACHER VACANCIES IN LA MAINTAINED SCHOOLS

Teacher vacancies in nursery, primary, secondary and special schools went down by 190 to 2,040 in January 2007.

Vacancies in nursery and primary schools went down by 50 to 660 in 2007. Vacancies in secondary schools went down by 120 to 1,200. There were 170 vacancies in special schools, similar to the 2006 figure.

The overall vacancy rate in nursery, primary, secondary and special schools for January 2007 was 0.6 per cent, compared to 0.6 per cent in 2006 and 0.7 per cent 2005. The 2007 vacancy rate was 0.4 per cent in nursery and primary schools, 0.6 per cent in secondary schools and 1.4 per cent in special schools.

TEACHER ETHNICITY IN THE LA MAINTAINED SCHOOL SECTOR

In January 2007, 94.6 per cent of teachers were recorded in the white ethnic groups, a decrease of 0.2 percentage points from 2006.

The Mixed/Dual group provided 0.7 per cent of the total in 2007, the same as in 2006;

The Asian or Asian British group provided 2.4 per cent of the total in 2007 an increase from 2.2 per cent in 2006;

The Black or Black British group provided 1.7 per cent of the total in 2007, the same as in 2006.

The increase in the percentage of teachers from minority ethnic (non white) groups was greater in the London region, 17.9 per cent in 2007 compared to 17.4 per cent in 2006.

TEACHER SICKNESS ABSENCE IN THE LA MAINTAINED SCHOOL SECTOR

An estimated 309,000 full-time or part-time teachers in England took sickness absence in 2006, approximately 57 per cent of the workforce an increase from the 55 per cent reported in 2005.

There were, on average, 5.3 days sickness absence per teacher that worked in the maintained sector during 2006, compared with 5.2 in 2005.

There were, on average, 9.3 days sickness absence per teacher taking sickness absence in the maintained sector during 2006, compared with 9.5 in 2005.

SUPPORT STAFF IN THE LA MAINTAINED SCHOOL SECTOR

The total number of support staff (FTE) rose by 17,900 to reach 305,500 in January 2007;

- the number of teaching assistants (FTE) rose by 9,800 to reach 162,900;
- the number of administrative staff (FTE) rose by 3,400 to reach 65,900;
- the number of technicians (FTE) rose by 600 to reach 23,600;
- the number of other support staff (FTE) rose by 4,100 to 53,000.

PUPIL:TEACHER RATIOS AND PUPIL:ADULT RATIOS

The overall PTR for the LA maintained nursery, primary and secondary sector was 17.1 in January 2007 compared to 17.2 in 2006.

In LA maintained primary schools:

- in January 2007 the within-school PTR was 21.8 compared to 22.0 in 2006;
- in January 2007 the within-school PAR was 12.4 compared to 12.8 in 2006.

In LA maintained secondary schools:

- in January 2007 the within-school PTR was 16.5 compared to 16.6 in 2006;
- in January 2007 the within-school PAR was 11.4 compared to 11.7 in 2006.

TABLES

Table 1 (New table)	Full time equivalent number of teachers, teaching assistants and other support staff in the local authority maintained sector and academy schools in England: January of each year.
Table 2	Full time equivalent teacher numbers in service in the local authority maintained sector in England by type of contract: January of each year.
Table 3	Regular teachers in service in the LA maintained sector in England by Government Office region: January 2007.
Table 4	Full-time regular qualified teachers in the local authority maintained sector in England by phase and grade: January 2001 to 2007.
Table 5	Head count of Advanced Skills Teachers in local authority maintained schools by phase and Government Office Region in England: provisional January 2007.
Table 6	Full-time vacancy rates in local authority maintained schools in England by grade: January of each year
Table 7	Full-time vacancy rates in LA maintained nursery, primary, secondary and special schools in England by Government Office Region: January of each year.
Table 8	Full-time classroom teacher vacancy rates in local authority maintained secondary schools in England by subject: January of each year.
Table 9	Part-time vacancy rates in local authority maintained schools by grade and Government Office Region in England: provisional January 2007.
Table 10	Temporarily filled full and part-time posts in local authority maintained schools by Government Office Region in England: provisional January 2007.
Table 11	Temporarily filled full-time head teacher posts in local authority maintained schools in England by phase: January of each year.

Table 12	Percentage distributions of teachers in the local authority maintained sector by ethnic group and Government Office Region in England: January 2004 to 2007.
Table 13	Full and part-time teacher sickness absence in the local authority maintained sectors in England: calendar years 2000 to 2006
Table 14	Full-time equivalent support staff in the local authority maintained sector in England by phase and type: January of each year
Table 15	Pupil:teacher ratios and pupil:adult ratios in local authority maintained nursery, primary and secondary schools in England by phase: January of each year

NOTES TO EDITORS

Changes to the SFR

1. A new table (table 1) has been added summarising the total number of teachers and support staff in service in the maintained schools sector in local authority maintained schools. A separate total for academies will also be included.
2. The academies schools table included in the 2006 publication will be deleted as this information is included in the new summary table (table 1).
3. Individual teacher vacancy tables for each phase of education by grade and government office region have been replaced by two new tables covering vacancies by grade and phase and government office region by phase.
4. The two government office region teacher sickness absence tables which were published as additional tables as part of SFR 18/2006 have not been included. These will be published in the revised September SFR following full data validation.
5. The support staff table has been revised to include additional information on type of support staff and is now broken down by phase of education.
6. All tables including those published as additional tables only in SFR 18/2006 will be published as part of the main hard copy publication, as well as PDF and Excel versions on the DfES web site.

Data sources and coverage

7. This SFR is based on statistics from the Annual Survey of Teachers in Service and Teacher Vacancies (618G) and the School Census (SC). Both surveys take place on the third Thursday of January each year.
8. The data on LA maintained teacher numbers, teacher vacancies, teacher ethnicity and teacher sickness are from the 618G survey. The survey includes the following teachers: regular teachers; occasional teachers; centrally employed teachers; teachers on employment based routes to QTS, overseas trained teachers and instructors without QTS; teachers on paid absence and any teachers brought in to cover for them; Academies are not covered by the 618G survey as these are not LA controlled.

9. The SC provides: all the support staff numbers shown in the SFR; the teacher numbers for Academies; the pupil numbers, teachers numbers and support staff numbers used to calculate the within-school PTR and the PAR. (Pupil characteristics and class size information from the SC are also published today in SFR 16/2007.)
10. The teacher numbers for the LA maintained sector in this release are from 618G only; SC data can be provided on request.
11. Pupil referral units provide education for pupils described in Section 19 of the Education Act 1996.
12. All tables exclude sixth form colleges.
13. Middle schools are classed as deemed, i.e. as either primary or secondary.

Data quality

14. Information from both the 618g and SC surveys for 2007 is provisional. No substantial changes are expected to SC survey information. Information has been received from all 150 LAs for the 618g survey. Although substantial changes are not expected it should be noted that the published figures are subject to revision as data validation has not yet been completed.
15. The form 618g figures for 7 local authorities are not complete as a small number of schools have yet to provide the required information. In these cases the teacher numbers for these schools have been estimated from SC 2006 figures. Substantial changes to teacher numbers are not expected in respect of these authorities. Estimates have not been made in respect of teacher vacancies, teacher sickness absence or ethnicity with respect to schools that have not provided information.
16. The 2001 vacancy figures are likely to have been overstated. Results from a telephone survey of vacancies at around the same time showed no increase in primary vacancies and a 10-20% increase in secondary vacancies compared to 2000. The 2002 survey introduced data on temporarily filled posts across all grades. This helped schools and LAs interpret the vacancy definition more accurately, and provided additional information on posts that are not permanently filled.
17. The 1998 teacher numbers and vacancies may have been affected by the higher than usual numbers of teachers taking early retirement in 1997, brought about by changes to the Teachers' Pension Scheme in September 1997.
18. The latest teacher ethnicity data, for the LA maintained sector, are provisional for January 2007. The first year of collection was January 2003. 2 authorities have yet to provide data for 2007 and their figures have been estimated using their 2006 figures. No estimate has been made of ethnicity numbers to compensate for teachers who refused to provide ethnicity information or where the LA was unable to provide complete information for other reasons. The ethnicity categories are based on those used in the 2001 national census;
19. The latest sickness absence data, for calendar year 2006 are provisional. The 2006 results include estimates for one authority that has yet to provide data. Two LAs could not provide all the full-time and part-time teacher absence data in the format requested. Data from a further 4 authorities has undergone some estimation pending further validation. Estimates have been imputed based on regional data.

20. Information from the SC (the numbers of support staff, teacher numbers in Academies and the teacher and pupil numbers underlying the PTR and PAR) has been received for all schools. Validation is continuing and therefore SC information is provisional and subject to revision. A software problem affected the support staff FTEs in table 14 in 2005. This is estimated to affect around 50 schools in 2004 and 410 schools in 2005. The 2002 support staff figures exclude approximately 320 in pupil referral units because the role of these is unknown. Investigation into this matter is continuing.

21. Final data will be published in a further school workforce SFR in September, this will include final LA level tables.

PTRs and PARs

22. The overall PTR for the LA maintained nursery, primary and secondary schools sector relates FTE pupil numbers from the SC to FTE numbers for all teachers from the 618G survey.

23. The within-school PTRs for each of LA maintained nursery, primary and secondary schools relate FTE pupil numbers in these schools to FTE qualified teacher numbers in these schools, from the SC. The SC includes teachers normally employed, within schools, in the survey week. Teachers absent for long periods or seconded to other duties are excluded, their replacements - provided they are qualified teachers - are included.

24. The PAR relates FTE pupil numbers in maintained nursery, primary and secondary schools to the FTEs of all teachers and support staff employed within schools, from the SC. Teachers absent for long periods or seconded to other duties are excluded, their replacements are included. Teachers without qualified teacher status, teaching assistants, librarians, technicians, minority ethnic pupil support staff, special needs support staff and other support staff are included, administrative staff are excluded.

25. Neither PTRs nor PARs reflect the deployment of teachers or class sizes within schools, although larger class sizes will tend to be associated with higher PTRs (SFR 16/2007 provides further details).

618G definitions

26. Definitions for 618G data shown in the SFR (LA maintained sector only):

- a. Full-time teachers in regular service are employed for five full days a week and have either a permanent contract or a temporary contract for one month or more;
- b. Part-time teachers in regular service are employed for less than five days each week and have a permanent contract or a temporary contract for one month or more;
- c. Teachers in occasional service have a contract of less than one month and are employed for the whole day on the survey date. The 2001 survey included, for the first time, occasional teachers without QTS from outside the European Economic Area (EEA). The subsequent surveys have included all occasional teachers without QTS, including those from within the EEA;
- d. Centrally employed staff, such as peripatetic and advisory teachers, are included;
- e. Teachers provided by teacher employment agencies are included;

- f. Education other than at school includes teachers who are employed by education authorities to provide education in institutions other than schools or pupil referral units, e.g. hospitals, home tuition, assessment centres;
- g. A teacher vacancy refers to a full-time or part-time appointment of at least one term's duration that, on the survey date, had been advertised but not filled. Vacancies include those filled on a temporary basis unless filled by someone with a fixed term contract of one term or more;
- h. The teacher vacancy rate is the number of vacancies expressed as a percentage of qualified teachers in post e.g. full (or head count number of part-time) regular teachers in (or on secondment from) the relevant sector plus the proportion of divided service, peripatetic, advisory and miscellaneous teachers relevant to that sector (from 618G);
- i. In tables 4 and 9 vacancy rates are classified according to the grade of the post to be filled and, for table 8 only, the main teaching subject. For years prior to 2001, the Database of Teacher Records is used to estimate teachers by grade for use in calculating vacancy rates by grade. For 2001 onwards the 618g survey provides a breakdown of teachers by grade. Data from the 1996 and 2002 Secondary Schools Curriculum and Staffing Surveys are used to calculate vacancy rates by subject. These rates have not been provided for 2007 as these are pending the results of the SSCSS survey undertaken during February 2007. Results of this survey are expected to be published in the summer of 2007 with subject vacancy rates available in the revised, September, School Workforce SFR
- j. Vacant head teacher posts are often covered by an acting head teacher appointed to that post for a term or more. For this reason table 11 shows temporarily filled head teacher posts, i.e. it uses a wider definition than the other vacancy tables;
- k. The sickness absence figures relate to working days during the calendar year in the LA maintained sector. The count of the number of teachers taking sick leave includes an individual teacher only once however many periods of sickness they may have had. The number of days taken as sickness absence includes all periods of sickness absence.

Teacher status

27. Qualified teachers are those who have been awarded qualified teacher status (QTS) either by successfully completing a course of initial teacher training (ITT) or through other approved routes.

28. Teachers are comprised of the following:

- a. Teachers with QTS or with the equivalent gained elsewhere in the EEA;
- b. Teachers without QTS, but with a professional qualification gained outside the EEA;
- c. Instructors without QTS, but with special qualifications in or experience of a particular subject.

Rounding and symbols used

29. Totals in the text and in the tables may not always equal the sum of their component parts because of rounding. Similarly, differences quoted in the text may not always be the same as the differences shown in the tables because of rounding. Symbols are used in the tables as follows:

- . not applicable
- .. not available
- negligible

(p) Provisional

Source: 618g survey (maintained sector teachers) and School Census

1. Excludes occasional teachers.

2. Includes qualified and other teaching staff in regular or occasional service in post on the census day.

3. Includes higher level teaching assistants, special needs and minority ethnic pupils support staff.

Totals may not appear equal to the sum of the component parts because of rounding.

Source: 618g survey

1. Seconded for one term or more. Secondees collected as full or part-time teachers from 2004 onwards.

2. 2001 includes occasional teachers without QTS from outside the European Economic Area. Since 2002 all occasional teachers without QTS are included.

3. Those on the Graduate Teacher Programme, the Registered Teachers Programme, the Overseas Trained Teachers Programme or the Teach First scheme.

4. Excludes occasional teachers.

Totals may not appear equal to the sum of the component parts because of rounding.

1. Advertised vacancies for full-time permanent appointments (or appointments of at least one term's duration). Includes vacancies being filled on a temporary basis of less than one term. See notes to editors paragraph 11 for further details.

2. Teachers in post include full-time qualified regular teachers in (or on secondment from) maintained nursery and primary schools, plus the primary portion of full-time regular divided service, peripatetic, advisory and miscellaneous teachers.

3. The number of teachers in post by grade is from the 618g survey for 2001 onwards, previous years were estimated using the Database of Teacher Records.

4. The role of assistant head was created in 2001.

Totals may not appear to equal the sum of the component parts because of rounding.
